

Hill House Road to Rodway Common and Emersons Green Circular Walks

7 Take the second right into Valley Road. Continue with the footway on the right, cross a road (Long Road again)

fork at the old Mangotsfield Railway Station. Shortly after passing beneath a road bridge you have a choice of route: either turn left and then right through the pinch gap stile onto a gravel track and continue as in 9 below; or continue straight ahead and alongside the Ring Road - then go to 10 below.

9 Follow the gravel track to reach a pond. Go round the pond to the right, through a kissing gate on to the Ring Road Cycle/ Foot path, and turn left.

10 Continue beneath the next bridge and take the next left (signed Shortwood) towards the Chain and Wheel Earthbank Sculpture (see below). After 40 metres turn right to climb the steep steps; walk along the top of the earth bank; at the end follow the path down the slope. You can avoid the steps by continuing along the Ring Road path, around the foot of the earthbank, and taking the next left to rejoin the route.

11 Fork left at the bottom, follow the tarmac path as it turns to the right near the top to emerge into the Emersons Green estate at a metal sculpture – the 'Now and Then' Sculpture which depicts the history of the local area and features castings of local residents' hands.

12 Cross the road into Emersons Green Lane and follow this lane to Church Farm Road. Turn left and then left again to skirt around Mangotsfield Primary School. At the end of this path you will see the Church Farm Colliery Engine House ahead of you. Turn right and then left around two sides of the Engine House on to a tarmac path.

13 Follow this path across another road and keep straight on. Fork left at the junction to join a more gravelled path and keep going. When you meet the road, continue ahead across Elmleigh Road and into Cossham Street. Now continue to the end of the walk as in 6 above.

The path forks at the old Mangotsfield Railway Station

The path alongside the Ring Road under the Shortwood Bridge

The Chain and Wheel Earth Sculpture:

This remarkable sculpture created by artist Lorna Green was built from the spoils of the new Emerson's Green development. It is one of the largest earthwork sculptures in the world at over a third of a mile long. The shape relates to the chains of past industry in the area, and the split coal wheel of Pucklechurch, a reminder of past mining locally. At the northern end of the sculpture is a large earth mound which contains a time capsule created by children at Mangotsfield CE Primary School in 2001. The capsule will be re-opened in 2026.

The publication of these walks was funded by the Downend & Bromley Heath Community Plan Group and the Parish Council. The aim is to encourage people to know their local parks and open spaces better. Download the walks from: www.downendbromleyheath.org or phone the Parish Clerk on 0117 956 7001 for further information.

A 3.4 mile walk around the footpaths of the Parish and walks starting from George V Playing Field can also be found on the website.

For regular, organised Walking to Health walks in this area, see www.southglos.gov.uk/walkingtohealth
